Modular manual carrier system

ezzLINKflex

ezzLINKflex is an innovative and flexible carrier system for weights of up to 500 kg. Originally developed for oil rigs, it can be used in the tightest of spaces. Pick up objects and with the help of a flexible boom around corners and obstacles move around.

ezzLINKflex can also be designed as a mobile carrier system so that it can be used where it is needed. So tools and components with different. Load handling devices can be moved with millimeter precision at different locations.

In contrast to conventional carrier systems, the ezzLINKflex capable of moments and thus offers added value. When the ezzLINKflex is no longer required it can be placed in a space-saving manner, e.g. along a wall or even like a chain, be rolled up.

Advantages:

The lifting work can be carried out on the column as well as on theEnd at the load handling device of the **ezzLINKflex** respectively. Flexible thanks to the quick change option.

Variants:

- Designed as a wall-mounted or column-mounted crane
- As a mobile crane together with the movable base plate **ezzLINKmobile**
- The **ezzLINKflex** consists of individual aluminum modules that are interconnected and secured
- All modules can be rotated against each other by 62 degrees so that the **ezzLINKflex** is enormous spacesaving and flexible
